Subject: Re: January 27th Pool Committee Meeting

As one who rather likes options but lacks any pool water-type predisposition, it sounds to me, Sue, like a question for "*the pool inspector.*" But I also vote for you Sue to do your parallel investigation, and don't stop checking out any other ecofriendly ideas you might have.

The energy and perseverance be with you...bob

Subject: Re: January 27th Pool Committee Meeting

Good Evening All

I personally thought the meeting went well. A lot of ideas, questions, comments were raised/made. I had asked about a 'saltwater pool'. Dan explained that a saltwater pool had been considered previously, but it would require more changes and would probably not be cost effective. Being the curious person that I am, I googled 'saltwater swimming pools' and was given a different option. A non chlorine, non salt option. So I clicked on it. It's a system that incorporate pure oxygen creation and copper ionization. Thereby making the pool crystal clear and algae free.

I find this to be a cleaner, less chemical option. I would like to call/contact the SwimFresh company and get more information. Specifically using the current pool (after renovations). I know (from the meeting) that we have a chlorinator that isn't very old, but maybe if we could go chemical free and the cost isn't too great, we might want to consider this alternative and possibly more eco friendly option.

I am asking permission of the committee and/or BOD to allow me to do this. Obviously, it would only be 'fact finding' and I wouldn't be committing us to anything.

Please let me know via email

Thank you
 Sue Corliss

Good Morning -

There will be a pool committee meeting on:

Sunday, January 27th
11 AM - 1 PM (may not take 2 hours)

I've invited the Pool Ops & Safety committee members as well.

Agenda items:

- Review a **draft recommendation for major pool categories** (repairs) based on an accumulation of data/emails over the past 3-4 years. I met with Ed and Carol to categorize this information.
- Architect findings and recommendations (pool facilities)
- Next steps...

I will publish meeting notes for those who are unable to attend, And I'll bring cookies for Harry (and the rest of you), bring your own coffee. Pro-Bowl (football) game is not on until 4 PM, I believe.

Thanks,

Cathie Harrison
