Sometime in the past 2 hours, the hose was pulled back onto the deck again

and loosened at the hose bib as well. Any suggestions how to stop this nonsense?

**Subject:** Pool Issues, sabotage of our efforts?

I believe that the pool committee started filling the pool sometime Saturday.

Sunday afternoon, I walked over to see how it was going and found that the hose had been pulled back out of the pool onto the deck and its output was simply running across the deck and down a drain. Later, a neighbor asked if we were filling the pool because she heard water running when she walked her dog before church. This indicates that the water was going down the drain all day and perhaps overnight.

I rerouted the hose under the fence so it was less obvious and turned the water back on into the pool.

Two hours later, I checked back and the water had been turned off at the hydrant. Harry was with me. We turned the water back on again.

We're still operating properly this morning.

I wanted to make you aware that someone is tampering with our efforts and literally flushing our water and money down the drain. It really disturbs me that people are sabotaging our efforts.
