Hi All,

I had a visit with Elizabeth Murray, reporter for the Wh Examiner. We went down to the pool and she took some pictures and walked around the site. Off the record she was very surprised that it "Looks very good." From reports she received she thought that it would be in much worse shape. She was also very impressed with our site..."beautiful location" and can not be duplicated today because of State rules and regulations around the shoreline.

I was very positive in my comments to her by telling her "the story" of moving here expecting a pool and seeing the pool in leadership on the board with the shocking statement that the pool could be closed if we didn't have an environmental assessment. I told her that there was no ballot for keeping the pool. She was shocked that our dues are a little, stating that most pools on the island have the monthly dues above \$200.

I also emphasized that we need to have a plan to move forward with the pool and building that could be completed within a one year period. I stated that I thought a Pool Planning Commission should be formed. I told her that the budget ballot was very confusing and was not clear regarding the increased savings to be put in a separate account in 2015 to refurbish the pool. I encouraged her to speak with Ed and some of the others running for office. I also made a clear statement that none of this has anything to do with a referendum. I am interested to see how this all shakes out.

We could probably do well to write a letter to the editor on some point.

Regards,
